To Our Customers And Other Friends

As many of you know, we purchased ECCLES NURSERIES from Mr. Ralph M. Eccles early last spring. We know that those of you who are acquainted with Mr. Eccles or who have dealt with him, will join us in wishing him every happiness and success in his other endeavors.

ECCLES NURSERIES began some sixteen years ago and has grown steadily ever since. We expect to continue this expansion program, but will not let our growth interfere with the personal service we want to give you. We shall remain big enough to serve you and small enough to want to. No order is too large or too small for us to handle.

This season we have a large supply of quality seedlings at unusually low prices. Don't let the prices fool you. This is fine stock, well-graded and true to size and description. Our large volume and direct-to-you sales permit these prices. Our sales extended into thirty-two states and Canada this past season and our inventory now numbers 30,000,000 seedlings. Bids on large volume orders will be gladly forwarded upon request.

We are looking forward to meeting many of you at the Pennsylvania Farm Show and Christmas Tree Growers' Meetings in other states. And, if you're in the vicinity, stop at our nurseries. We'll be glad to show you how our seedlings are grown and answer any questions we can about your own specific problems.

Sincerely,

J. A. Birocco

Nova Tomasello

"Why not be proud of Our Nursery Stock?"

Remarks from satisfied customers who used our seedlings for establishing their plantations during the year 1959.

OHIO — In twenty years of buying and putting out pine trees, I have never had nicer trees or a better buy — They are excellent.

NEW JERSEY — I received the trees in excellent condition and I am very pleased with them.

PENNSYLVANIA — I am very well pleased with quality of trees, best I have ever received.

WYOMING — The trees came thru in excellent shape just three days after you shipped them. We are very well pleased.

PENNSYLVANIA — I found the trees I purchased from you to be excellent stock.

Place your order now while the sizes and species are available. Give second choice on late orders.

Sheared Scotch Pine

Scotch Pine

Presently the most popular pine in the Eastern United States. Distinguished by its medium length needle and light green color, Scotch is a "must" for a beginner in Christmas tree growing.

Scotch Pine — Eccles

Fastest Growing and Straightest.

7-14" — Seedlings, 3-yr.

5-10" — Special Grade

4- 8" — Seedlings, 2-yr.

2- 4" — Seedlings, 2-yr.

Scotch Pine — French

Short Needle, Blue-Green Color.

5-10" — Seedlings, 3-yr.

4- 7" — Seedlings, 2-yr.

2- 4" — Seedlings, 2-yr.

Scotch Pine — Spanish

Short Needle, Blue-Green Color.

5-10" — Seedlings, 3-yr.

4-7" — Seedlings, 2-yr.

2-4" — Seedlings, 2-yr.

Scotch Pine — Austrian Hills

5-10" — Seedlings, 3-yr.

4-7" — Seedlings, 2-yr.

2-4" — Seedlings, 2-yr.

Scotch Pine — German

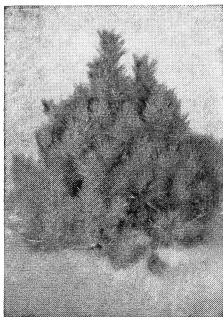

5-10" — Seedlings, 3-yr.

4-7" — Seedlings, 2-yr.

2-4" — Seedlings, 2-yr.

Red Pine

For certain areas, Red Pine is the ideal Christmas tree. Its value as a timber tree is very good and if it doesn't move as a Christmas tree it will always pay off as marketable timber. A block of Red Pine should be considered in any plantation.

Available in Two Sizes

- 5-9" — Seedlings, 3-yr. Good quality. A limited supply.
- 2-4" — Seedlings, 2-yr.

Austrian Pine

Rapidly gaining in popularity as a Christmas tree. Good color each season with long, stiff needles which make it ideal for shearing. Austrian has excellent timber possibilities and should be given great consideration in any planting schedule.

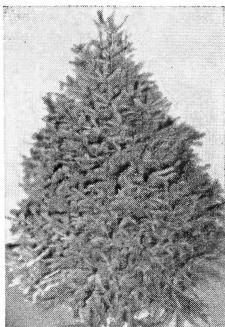

Available in Three Sizes

- 6-12" — Seedlings, 3-yr. Heavy stock, good seller.
- 3-6" — Seedlings, 2-yr. Good regular size.
- 1-3" — Seedlings, 2-yr.

Douglas Fir

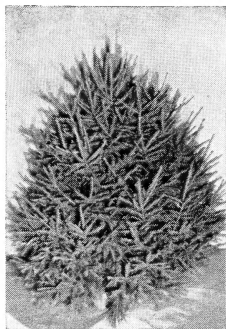

Douglas Fir is a slow grower but will always produce number one Christmas trees with little shearing. Planting sites with high elevations and preferably north slopes are best suited for this species. Do not plant them in frost pockets or at low elevations.

Our stock was produced from the "Colorado Blue Douglas Fir" seed origin which we consider winter hardy, if planted on selected sites.

Available in Three Sizes

- 4- 8" — Seedlings, 3-yr. Good size. Excellent color.
- 2- 4" — Seedlings, 2-yr. Excellent for transplanting.
- 5-10" — Transplants, 2-2

Norway Spruce

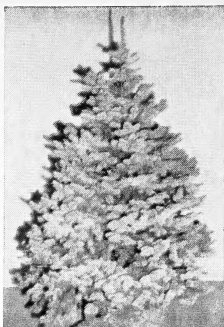

Norway Spruce is perhaps the most popular of the spruce family for the Christmas tree grower. Its much more rapid growth than other spruces and beautiful color place it among the leaders in popular demand. A desire for rich moist soil and little need of shearing are its chief characteristics.

Available in Four Sizes

- 8-14" — Seedlings, 4 yr. Top quality seedlings.
- 5- 9" — Seedlings, 3 yr. Limited supply.
- 2- 4" — Seedlings, 2 yr. Economical buy.
- 10-16" — Transplants, 2-2. Premium stock.

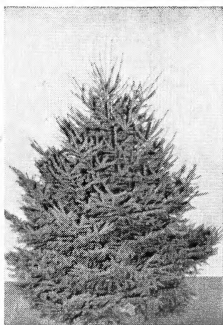

Colorado Blue Spruce

The leading ornamental tree of the spruces, an excellent Christmas tree but a very slow grower. Likes deep moist soil with little shearing necessary. Top prices can always be obtained from the Colorado Blue Spruce as Christmas tree or ornamental.

Available in Four Sizes this Spring

- 4- 8" — Transplants, 2-2. Very good stock, limited quantity.
- 5-12" — Transplants, 2-3. Top quality.
- 4- 8" — Seedlings, 3-yr. Economical size to select.
- 2- 4" — Seedlings, 2-yr. Ideal for transplanting.

White Spruce

White Spruce is becoming more popular as a Christmas tree although its growth is somewhat slower than Norway Spruce. No shearing is required on this specie to produce excellent Christmas trees.

Available in One Size this Spring

- 5-9" — Seedling, 3-yr. Top quality, limited quantity.

Chinese Chestnut

A blight resistant chestnut tree with fruit comparable with that of bygone days. Many tree growers are finding a place for a few chestnut trees on their farms. A very good market exists both for eating and seed. Plant a few this year. Requires two plants for pollination.

Available This Spring

From 15-24 inches up.

Pruning Shears

Model DK-505

These scientifically designed shears make this the most efficient tool for shearing Christmas trees. The hollow ground serrated blades are thru-hardened and made of hi-carbon steel. Light weight durable handles, rubber bumper. Length 21" with 8½" cutting stroke.

Price \$5.50 per pair postpaid, and in Pennsylvania add 4% sales tax.

Model DK-507

This is Doo-Klip's topnotch performer with durable wood handles with plated ferrules and the polished hi-carbon steel blades are hollow ground to maintain a keen cutting edge. The special rubber bumper absorbs the shock of day-long shearing.

Price \$5.50 per pair postpaid, and in Pennsylvania add 4% sales tax.

Rubber Handle Shears

Serrated blade combined with rubber grip handle make these a very efficient tool for shearing.

Price \$5.50 per pair postpaid, and in Pennsylvania add 4% sales tax.

Steps to Consider in **Planning** **A Christmas Tree Plantation**

1. Species to Plant

The Christmas tree retail market answers this. What trees are most popular in your area? Usually two or three species get the most call. Never specialize in one variety; the danger of disease in that particular one would take you off the market. It's better to be safe than sorry. Prices fluctuate as well as the possibilities of a glutted market in one specie.

2. Spacing

This is a controversial subject. We have always used 5 x 5' spacing with good results but some of these trees prove to be quite close as they grow larger. Probably 6 x 6' would be the ideal spacing for most species. Number of trees required per acre for the following spacings: 4 x 4' — 2720 trees; 5 x 5' — 1740 trees; 6 x 6' — 1210 trees.

Plantation of Sheared Scotch Pine.

3. Planting

Trees should be planted in blocks for easier marketing. Road ways and fire lanes should be quite frequent to give access to the plantations at all times. Think in terms of how you are going to sell, cutting yourself or selling on the stump. It's much easier to count and divide in the original planting than at marketing time.

Machine planting has proved very successful. Good straight rows are assured as well as assurance of getting stock in quick, not having to worry about long periods of nice weather. Write for planter information.

In hand planting, two men work well together, with one making the holes and the other inserting

the seedlings. The dirt should be firmly tramped in around each tree with your heel. Approximately 2000 per day can be planted in this manner. For ease in making the holes, we suggest a "Planting Bar," which speeds up the planting as well as eliminating excessive stooping. Eccles Planting Bars are available at the nurseries for \$3.75 each or shipped postpaid for \$4.25.

4. Care of Seedlings on Arrival

This is often the difference between success and failure in the entire program. On receipt of stock extreme caution should be observed in assuring that the roots are never exposed directly to sun or wind. If immediate planting is impossible, heel the trees in a long trench deep enough to completely cover the roots. Replace the earth, tramping it firmly to prevent air from entering. Water often and see that seedlings are placed in buckets of water when taken to the field.

5. Planting Time

Best results are usually obtained from Spring planting, March 15 to May 1. It is well in ordering to make your order for delivery to be as soon as possible rather than a set date. Spring weather often throws us off schedule on certain dates where we could have shipped earlier and the seedlings

Handy Dandy Tree Holder

We can offer you a chance for extra sales by offering you dealer prices. Don't miss out. It's New. It's Different.

might have been heeled in. Fall plantings have been made with good results on some of the lighter soils, but we do not recommend this on heavy clay soils due to extensive winter heaving. Heavy sod cover is very necessary if fall planting is done.

6. Care of Plantation

Grass should be kept mowed between the rows of trees to provide plenty of light and air. Shearing is usually begun about the third year in the field. Most county agricultural agents can supply bulletins on shearing techniques and insect control. We also recommend that you join the Christmas Tree Growers' organization in your state. Besides providing the means of exchanging the latest ideas and techniques, most organizations now have a marketing service to help you sell your trees. Write us for the address of the organization in your state.
